

# BREAKING – Director-General of the WHO claims “Countries are giving Boosters to kill children, this is not right”

[expose-news.com/2021/12/22/tedros-says-countries-killing-kids-with-boosters](https://www.expose-news.com/2021/12/22/tedros-says-countries-killing-kids-with-boosters)

By The Exposé December 22, 2021

**Footage has emerged of Dr Tedros, the Director-General of the World Health Organization, claiming countries are intentionally giving booster shots of the Covid-19 vaccine to children to kill them.**

Tedros was speaking at the hybrid press conference with Geneva based Palais des Nations journalists held on Monday 20th December 2021 when he made the following remarks –

“So if it’s going to be used (*the Covid-19 vaccine*) it’s better to focus on those groups of severe disease and death, rather as we see **some countries are using to give boosters to kill children, this is not right.**”

The strange slip comes after [Dr Tedros was recorded speaking with Brazil’s President, Jair Bolsonaro](#), at the G20 summit in Rome in which he confirmed that the Covid-19 vaccines are incapable of preventing infection and transmission of the virus, that the WHO does not support the use of Vaccine Passports as they are discriminatory, and the WHO does not recommend children are giving the experimental jab.

It is unclear whether Tedros meant to state that countries are deliberately killing children with booster shots of the Covid-19 vaccines, or whether it was just a slip of the tongue. But the Director-General of the WHO did not correct himself, and there is plenty of evidence that the Covid-19 injections are causing life threatening events, permanent disabilities, and deaths among children.

An [investigation of data found in the USA’s Vaccine Adverse Event Reporting System \(VAERS\)](#), found that up to November 5th 2021, the Pfizer Covid-19 injection had caused 16,880 adverse events, 5,161 emergency room visits, 1,365 hospitalisations, 264 life threatening events, 120 permanent disabilities, and 29 deaths among children between the ages of 6 and 17.

	Adverse Events	Emergency Room Visit	Hospitalised	Life Threatening	Permanent Disability	Death
<b>Total</b>	16,880	5,161	1,365	264	120	29
<b>Average / lot administered</b>	23	7	2	0.4	0.2	0.04
<b>Min / lot</b>	1	0	0	0	0	0
<b>Max / lot</b>	428	136	34	8	5	1
<b>Total Count of Lots administered</b>	748					
<b>Total Count of Lots responsible for at least 1 Event</b>	748	392	163	78	48	15 (min.) (Max 29 when including UNKNOWN Lot No.)

Here are a few examples of the [specific reports of deaths among children](#) occurring due to the Covid-19 vaccine –

A 16-year-old female received the Pfizer vaccine on the 19th March 2021. Nine days later the same female went into cardiac arrest at home. By the 30th March 2021 she had sadly died.

VAERS ID: 1225942 ● ONSET: 9 days AGE: 16 SEX: F

patient was a 16yr female who received pfizer vaccine 3/19/21 at vaccine clinic and presented with ongoing cpr to the ed 3/28/21 after cardiac arrest at home. patient placed on ecmo and imaging revealed bilateral large pulmonary embolism as likely etiology of arrest. risk factors included oral contraceptive use. labs have since confirmed absence of factor v leiden or prothrombin gene mutation. patient declared dead by neurologic criteria 3/30/21.

A 15-year-old female suffered cardiac arrest and ended up in intensive care four days after having the Moderna mRNA jab. She also sadly died.

VAERS ID: 1187918 ● AGE: 15 SEX: F

i do not know the exact date of the first or second moderna vaccine. i am the picu attending who cared for the patient after her cardiac arrest which we believe was about 3-4 days after her second moderna vaccine

Evidence from [data published by the Office for National Statistics](#) on deaths in England and Wales, also shows that since all children over the age of 12 were offered the Covid-19 vaccine deaths among kids have increased significantly against the five-year-average.

[Source](#)

The following chart shows the cumulative number of deaths per week, between week 38 and week 45, among all children aged 10-14 in [England and Wales in 2021](#), and the 2015-2019 [5-year-average dataset](#).

Between week 38 and week 45 in the [five-year-average dataset](#), a total of 41 deaths among children aged 10-14 occurred. But during the same time frame this year a total of 59 deaths have occurred among children according to the [2021 dataset](#). This represents a 44% increase on the five-year-average since they were offered a Covid-19 injection.

There can be no doubt that after two years the official data proves that children do not suffer serious disease due to Covid-19, let alone die with it.

So whether Tedros meant to state that countries are intentionally killing children with Booster shots of the Covid jabs, or it was a slip of the tongue, he is still quite correct that if they are going to administer the injections to anybody at all then it should be the most vulnerable and not children.

*“So if it’s going to be used (the Covid-19 vaccine) it’s better to focus on those groups of severe disease and death, rather as we see some countries are using to give boosters to kill children, this is not right.”*
